# DENTAL HYGIENE

## Put Some Teeth Into Your Future.

You know from visiting the dentist that dental hygienists do a lot. But did you know how much? They're licensed dental health specialists, providing patients with preventative, educational and therapeutic services, promoting oral health and controlling oral disease. They observe and record abnormalities, take oral X-rays and apply fluoride and fissure sealants. They also provide periodical therapies, such as root planing, as well as plaque, calculus and stain removal. The framework for this type of oral care is known as the Dental Hygiene, or DH, process of care.

Students in the Carrington College Dental Hygiene program develop the skills to provide comprehensive dental hygiene care as well as professional communication skills and a knowledge of ethical standards and behavior. The program culminates in an Associate of Science degree in Dental Hygiene. Graduates of the program are prepared to take the Dental Hygiene National Board and state licensing examinations.†

*Individuals seeking to enter this career field may be subject to screenings such as, but not limited to, criminal background checks and drug/alcohol testing prior to externship, to attain occupational licensure/certification or employment and throughout their careers.*

### Duties May Include:

- Assessing a patient's oral health
- Removing plaque, calculus and stains
- Providing X-rays
- Administering local anesthesia
- Applying fluoride
- Providing oral-hygiene instruction

### Possible Employment Opportunities:

- Dental offices
- Public health agencies
- Community dental clinics

*In addition to meeting the College's standard admission requirements, candidates must:*

- Pass the college entrance exam
- Obtain health care provider CPR certification
- Complete a dental hygiene observation
- Attend an information seminar
- Complete the following prerequisite courses at an accredited college or university, with a minimum grade of C and an overall GPA of 2.75 or higher:

#### General Education

- Speech/Oral Communication
- Introduction to Sociology
- English/Writing and Composition
- General Psychology

#### Science\*

- Organic Chemistry with Lab
- Inorganic Chemistry with Lab
- Microbiology with Lab
- Human Anatomy with Lab
- Physiology with Lab
- General Nutrition

\* Science courses must have been completed within the previous five years.

*Students meeting all program requirements will be selected using points earned from the following criteria:*

- GPA on all prerequisite courses
- Dental-related work experience (RDA and/or DA only)
- Supplemental education

### Post Admission Requirements

*Admitted students must provide the following documentation prior to starting the program:*

- Proof of immunization status for communicable diseases
- Proof of TB clearance
- Physician clearance for working in dental hygiene clinical environment
